EDUCATION

Chennai Institute of Technology

B.Tech in Information Technology; CGPA: 8.415/10

Chennai, India

2023 – Present

EXPERIENCE

Software Development Intern

Aug 2024 – Mar 2025

Gogosoan Pvt. Ltd.

- Developed robust data collectors for US and Indian markets fetching missing records, ensuring efficiency and integrity.
- Conducted comprehensive quantitative **backtests on multiple trading strategies** to identify, exploit inefficiency.
- Carefully **analyzed research papers** to design trading models addressing market anomalies and increase profit.
- Successfully **migrated 3.4 million** legacy records safely and efficiently to prod with zero downtime and no data loss.

PROJECTS

Quantitative Trading System (GoGoSoon)

Aug 2024 – Nov 2024

- Engineered high-frequency data collector using Polygon & Zerodha APIs to process **1M+ live market records daily**.
- Reduced data retrieval **latency by 76%** through implementation of parallel processing with async I/O optimizations.
- Achieved **8x Performance** by further optimizing backtests with fully asynchronous execution for trading algorithms.
- Created **visualizations** to analyze market trends and **tested multiple trading models** to evaluate performance.

Exam Proctor

Jul 2025 – Sep 2025

- Built a storage service using **optimized FFmpeg config** for efficient recording and management of exam sessions.
- Replaced socket-based streaming system with WebRTC, **reducing latency 40%** and enhancing overall stream stability.
- Enhanced face verification system, cutting **server load by 35%** while maintaining **95% detection accuracy**.
- Integrated web app with Safe Exam Browser, restricting **remote access, shortcuts**, ensuring **locked-down exams**.

iHirn (GoGoSoon)

Nov 2024 – Mar 2025

- Contributed to the development of iHIRN, a cognitive skill enhancement platform serving over **1000 active users**.
- Streamlined **cross-platform responsiveness** and performance across desktop browsers, iOS(Safari) and Android.
- Engineered interactive animations and feedback loops to significantly boost engagement and reinforce memory retention.
- Improved the game interface to be more user-friendly and added **adjustable difficulty levels** based on user feedback

TECHNICAL SKILLS

- Programming Languages:** C/C++, SQL, Go, JavaScript, TypeScript, Python, Java, Lua, Bash, HTML, CSS.
- Skills:** Git, Docker, Linux, AWS, REST API, Multi-Threading, Jira, MySQL, PostgreSQL, MongoDB, PGVector.
- Tools & APIs:** NodeJS, Polygon API, Zerodha API, GitHub, GitLab, LangChain, Ollama, WebSocket, ffmpeg.
- Frameworks & Libraries:** Pandas, ReactJS, NextJS, ExpressJS, MultiProcessing, Matplotlib, WebRTC, Seaborn.

COMPETITIVE PROGRAMMING

- LeetCode (RaghulSub): **Max rating 1914, Top 4.71%**, Solved **1115 problems**, Achieved highest **ranking of 553**.
- CodeChef (raghulsub) – Reached **Max Rating: 1654** (3 stars) and secured a peak **global rank of 120**.
- CodeForces (RaghulSub) – Earned **Max Rating: 1397** (Pupil) while achieving a top **global rank of 2966**.

ACHIEVEMENTS

- Runner-up (HackIT)** - designed a cloud log analyzer to perform security audits and detect anomaly in logs effectively.
- Finalist (COD-a-thon)** - a competitive programming challenge, ranked among the top 20 participants.

CERTIFICATIONS

- AWS Cloud Practitioner (CLF-C02)**
- Cybersecurity Essentials (CISCO)**
- Introduction to Cybersecurity (CISCO)**
- Networking Essentials (CISCO)**
- Database Management System (NPTEL)**
- Problem Solving Through C (NPTEL)**
